

FCC ruined FM... all the stations I once enjoyed have been pulled from the air, fined on a regular basis or is being censored. XM radio is America's alternative to a media that is plagued with organizations that do not let a citizen exercise his 1st Amendment. XM is radio that I proudly pay a premium price for to listen to people exercise that right on the same medium as Cable TV. Everyone in America has the ability to change the station when they do not want to listen to something. Do not inhibit me or anyone else the right to PAY for a right we should already have... to choose to listen to what we want to listen to.

Step off... and fight for our freedom, and not pander to the people that are somehow unable to change the station, but are able to march, protest and petition to keep other people from listening to what they do not want to listen to.

The FCC has forced me to pay a premium to listen to what I want to listen to. I just spent \$600 on hardware and \$200 for a 2 year subscription. I am fueling the economy in the process of getting what I feel I already deserve. Do not side with the people that cost tax payers money preventing what we have a right to.

Thank you for listening, now let me listen.
